Intel Announces Next US Site with Landmark Investment Ohio

As the largest single private-sector investment in Ohio history, the initial phase of the project is expected to create 3,000 Intel jobs and 7,000 construction jobs over the course of the build, and to support tens of thousands of additional local long-term jobs across a broad ecosystem of suppliers and partners. Spanning nearly 1,000 acres in Licking County, just outside of Columbus, the "mega-site" can accommodate a total of eight chip factories – also known as "fabs" – as well as support operations and ecosystem partners. At full buildout, the total investment in the site could grow to as much as \$100 billion over the next decade, making it one of the largest semiconductor manufacturing sites in the world.

Planning for the first two factories will start immediately, with construction expected to begin late in 2022. Production is expected to come online in 2025, when the fab will deliver chips using the industry's most advanced transistor technologies. Ohio will be home to Intel's first new manufacturing site location in 40 years. "Immense Impact Section of Intel's Publication / Intel Announces Next US Site with Landmark Investment Ohio" 1.21.2022
